LAN Management I and II Training Scheduled

If you have System Management (including your Local Area Network) responsibility in your council, you won't want to miss this opportunity to attend LAN Management Training I & II. Managing your network is an important part of your daily or weekly routine. Getting it right means the difference between an office that runs smoothly and one with constant issues that must be addressed.

The last installment in this training series is LAN Management III, where you actually build a network, but you must have attended LAN I & II to be eligible to attend LAN III. Mark Nov 11-13 on your calendar and plan to attend this vital training. Hurry! Class is limited to only twelve (12) participants. Registration and information can be found [here](#).
